ABOUT ME

Highly skilled Python developer with extensive experience in developing and implementing complex software applications using various Python frameworks and libraries. Proficient in designing and developing scalable and high-performance applications for a wide range of industries. Adept at collaborating with cross-functional teams, implementing best coding practices, and ensuring the delivery of high-quality, fully-tested code. Strong problem-solving and analytical skills, with the ability to quickly learn and apply new technologies to achieve project goals. Passionate about continuous learning, innovation, and staying up-to-date with the latest industry trends and advancements.

Hemanthkumar Yegireddy

PYTHON DEVELOPER (MACHINE LEARNING ENGINEER)

WORK EXPERIENCE

Python developer (Machine Learning Engineer)

Jobiak Software pvt. Ltd. / Hyderabad / Feb 2022 - Present

I serve as a Machine Learning Engineer and a Python developer for both the back-end and front-end of applications.

I can handle every part of the industry as a developer. In essence, I have to create machine learning models that are essential to our product.

I am familiar with the technologies that are utilized to deploy, maintain, and update our product.

Techs I've familiar with,

1. Python: Flask, Django, pandas, Spacy, Scikit learn, Transformers.

2. Front-End: HTML, CSS, js, Bootstrap, etc.

3. DB's: MongoDB, SQL

4. Tools: Studio 3T, Postman, etc.

5. Other Techs: Docker, Kubernetes, Jenkins, git.

EDUCATION

Master's Degree

Vignan's Institute of Information Technologies / Visakhapatnam / 2022

In Visakhapatnam, I finished my master's program in computer applications At VIIT. I've worked quite hard to charge with a variety of technologies there.

SKILLS

Python

Flask

Database

Kubernetes

Django

Front-End Tech

Docker

Git, Jenkins

HOBBIES

- 1. Coding On Personal Projects
- 2. Putting On Music, Skateboarding
